If you have a JSON wallet file from *go EGEM*, you can decrypt it here. No information is shared with **any** server.

JSON Wallet:

Drop JSON wallet file here

Password:

(password)

Unlock JSON Wallet

If you have a 12 word mnemonic phrase, you can generate your wallet here. No information is shared with **any** server.

Mnemonic Phrase:

(mnemonic phrase)

Path:

m/44'/1987'/0'/0

Derive Wallet

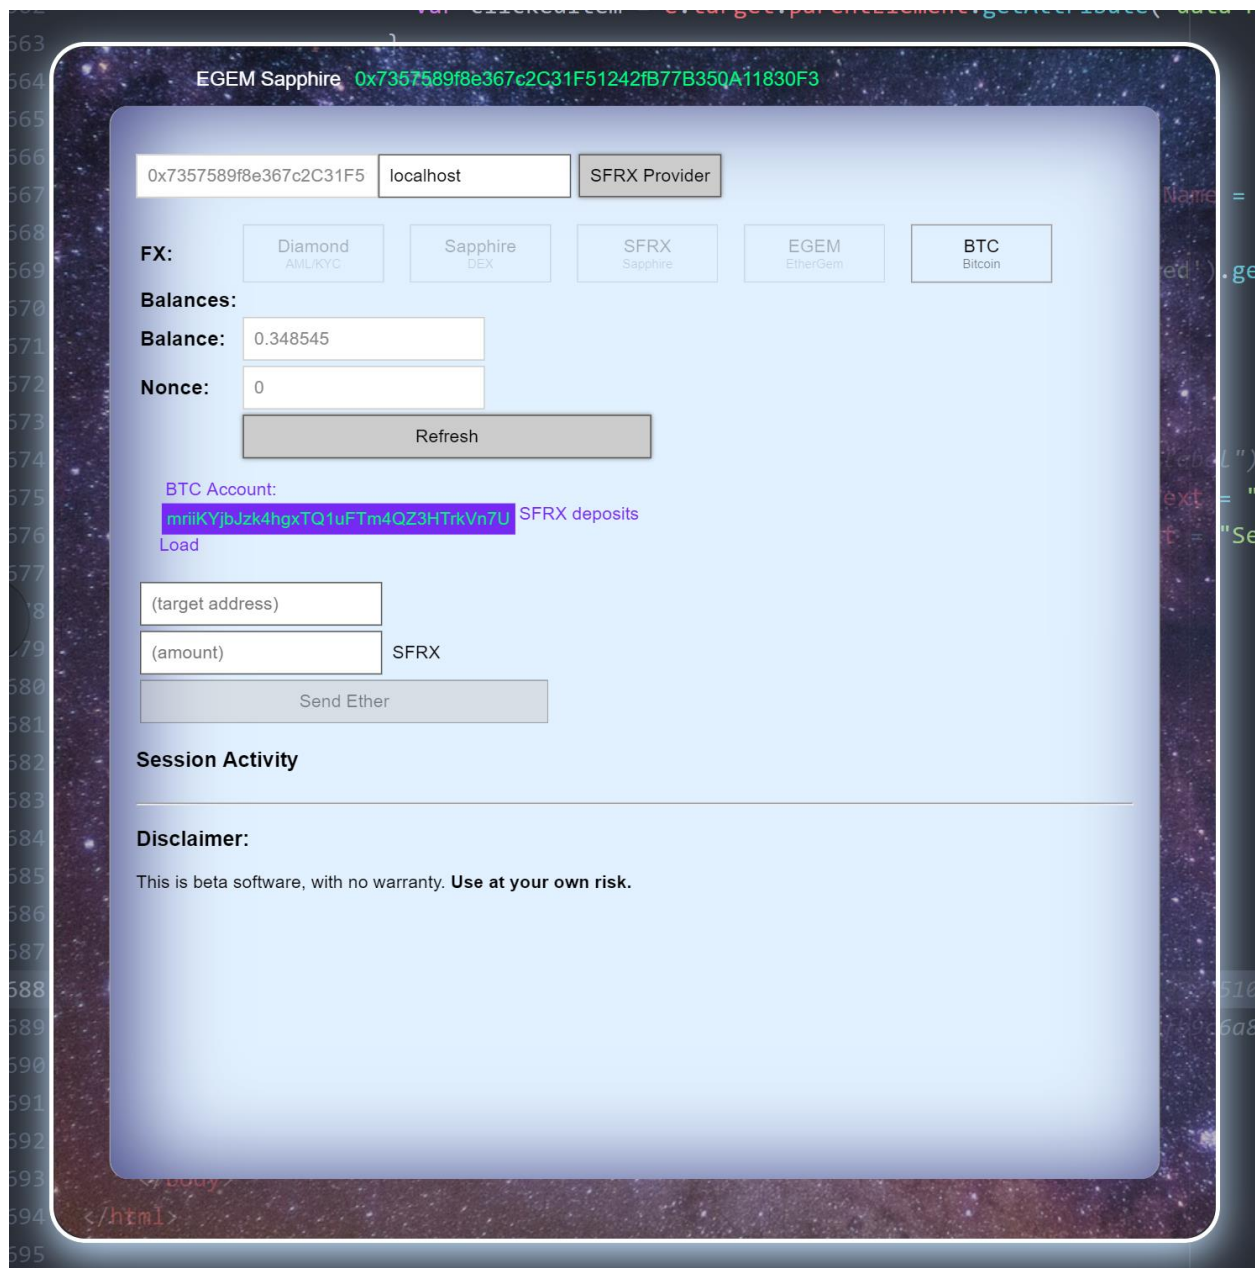

If you have a private key, you can open your wallet here. No information is shared with **any** server.

Private Key:

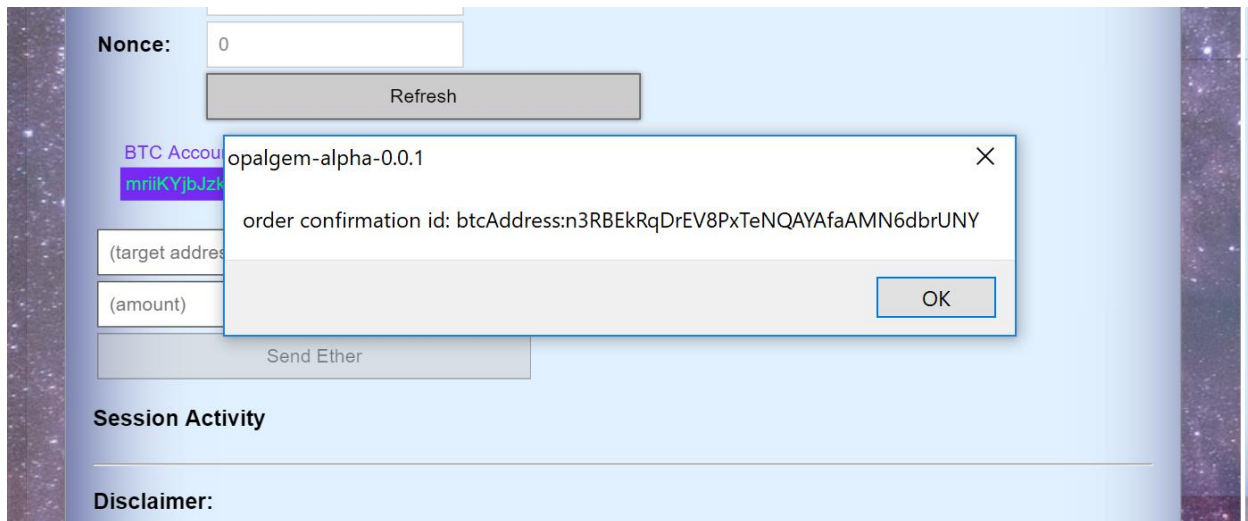

(private key)

Load Raw Private Key

Open a clean wallet

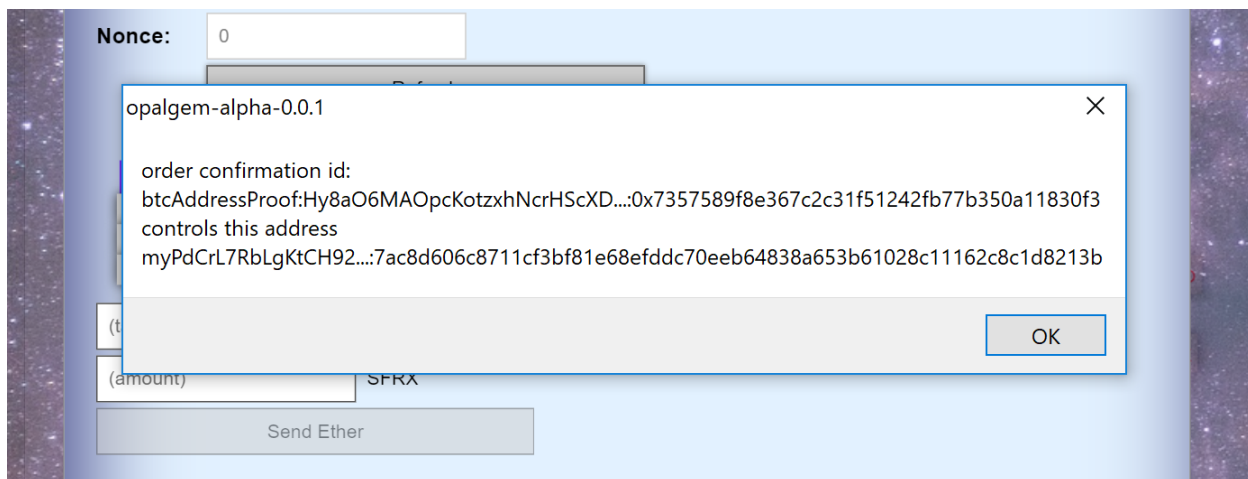

Log in and go to BTC page you will see your network BTC addy and any BTC – this is not 5 second bitcoin – here we load any unspents.... (click the little load)

These are the addresses you control for 5 second bitcoin...you can make a new one by clicking SFRX deposits

I clicked the one on the lower right

It tells me I own it with this message

Refresh

[illegible]

And now.....

Sehid owns that address....

Yet, unfortunately atm so do I..... I probably have to edit my delete script
